

Case Study - Entecon Industrial

As market leaders in the world of Aero-Mechanical Conveying, Entecon manufacture the equipment that moves, sorts and packages powders, pigments and just about any particulate matter from cornflakes to coffee. Over the last 3 years I have photographed virtually all of their range.

From the photography, our relationship with Entecon has naturally developed into handling their advertising requirements and becoming involved in their website and brochure design. We hold a vast store of images and artwork and when Entecon book advertising or exhibition space, we deal with the artwork and design on their behalf.
